# Terms of Engagement: wetland figure drafting

**Danir Kantserov**, architecture student at Politecnico di Milano; GIS/CAD drafting in QGIS
Milan, Italy · danirkantserov@gmail.com · Version 1, October 2026

These terms come with every quote and apply unless we agree otherwise in writing.

**1. Scope.** I produce figures and GIS/CAD files from the data you supply (GNSS exports, data-form IDs, the survey-area boundary; for impact or permit sheets, the project design and photos). Your scientist makes every wetland determination, reviews every figure before submittal and signs the report. I don't do fieldwork, land surveying or wetland determinations; sites in agricultural production are out of scope for now. Sheets can carry the note "Mapped from GNSS data collected by [your firm]; not a land survey".

**2. Price and delivery date.** From $150 per figure set (the figures and files for one delineation report). Each job gets a fixed quote and delivery date before work starts, based on acreage, features, sheets and deliverables. Changes to the data or the scope after the quote are quoted as new work.

**3. Free test.** Send me one figure from a report you've already filed (or one that is public), and I'll redraw it in your format so you can compare. No charge, no obligation; I use the figure only for this test.

**4. First job: you pay only if you use the maps.** On the first job for your firm, the quoted price is due only if you use the maps: any map or file goes into a submittal, is delivered to your client or an agency, or becomes the base for your own figures. If you won't use them, tell me within 30 days of delivery; you owe nothing, and your data is deleted on request. One such job per firm.

**5. Corrections.** One correction round is included for mapping issues: the format, labels or numbers on the maps, not the field boundaries. I make the corrections within 3 business days of your request, for requests made within 12 months of delivery. Further changes are new work.

**6. Liability.** My liability for a job is limited to the fee you paid for it. I'm not liable for indirect or consequential losses, such as permit delays. I don't carry professional-liability insurance.

**7. Confidentiality.** Your data, project and client details are confidential and used only for your job. I'll sign your NDA if it allows the processing in section 8.

**8. Data handling.** Your files stay on my computer and in the channel you send them through; I send deliverables through a private folder shared only with you. Some processing is AI-assisted (Anthropic's Claude, with model training turned off), so parts of your files may pass through Anthropic's service; I share them with no one else. If your contract forbids AI tools or offshore handling of the data, tell me before you send anything. Please remove landowner names and other personal details. CNDDB data: only under your licence, never put into an AI tool, given up when the work ends. Your data is deleted on request, otherwise at the end of the correction period.

**9. Ownership.** On payment, you own the deliverables and all rights in them. They are white-label: your title block, your firm named as creator, my name only if you want it. I keep a copy for corrections and my records, and show it to no one without your permission.

**10. Payment.** Invoice in USD with the delivery, payable by Wise (US bank details, so an ACH transfer for you) or PayPal. Payment is due on delivery; on the first job, when you first use the maps. Fees on your side are yours. I'm a non-US individual working in Italy; IRS Form W-8BEN on request.

**11. Your own agreement.** If you prefer your own subconsultant agreement or purchase order, send it and I'll review it.
